

Tips for Volunteers/Host Churches

Limit visitors to people in shelter. Have only one entrance and screen everyone for fever, cough, or known COVID exposure at the doorway. No one with symptoms should be allowed in the shelter area.

To encourage continued volunteer participation, arrange areas outside of the shelter for food and supply drop offs.

If you are a hosting facility, arrange for daily professional cleaning service that includes wiping down all surfaces with a germicidal product.

Remember the virus is more dangerous for people over 60 or those with chronic conditions, limit their direct contact with shelter residents, and limit time spent in the shelter area during the host week.

Continue to practice frequent handwashing.

Avoid shaking hands or hugging.
